

Notes Title:

This area is to add some notes or links. Edit the sidebar.js to update this text area. [More...](#)

Allwebco Minisite

Allwebco Minisites are small sites created for fast loading, browser compatibility and super easy setup. Although these templates contain only a very few pages, expandability is unlimited. All Minisites use plain text menus and a Flash header logo that you can update with any plain text editor. No special software is required to setup any Allwebco template. Globally change the font sizes and colors by editing a single CSS style file. You do not need to update each page individually. Switch to a graphic logo header by renaming one file. Add a new link button on the menu by editing a single text file.

Allwebco Flexibility

Every Allwebco Minisite includes [step by step instructions](#) and unlimited support and access to our [searchable support area](#). You can also easily exchange the Flash logo above with your own graphic logo by renaming one file. All Allwebco templates come with helpful setup options so you can setup and customize your website for any business quickly and easily without having to learn any new software. [View this page with the included graphic logo option.](#)

Allwebco Expandability

Plain text menus and basic HTML designs you can add as many pages as you require to any template. You can also add scripts, applications, links, images and almost any feature you see on other websites can be added to any Allwebco template. Allwebco also provides many [free scripts and add-ons](#) as well as reasonably priced [premium add-ons](#) that can be added to any Allwebco template.
